

SOLAS OXFORD

Lighthouse MBT-Parenting Programme (LPP) Five Day Basic Online Training

Tutors: Gerry Byrne and Rory Bolton

Date: 20 to 24 April 2026 | 8am to 2pm | Online through Zoom

The Lighthouse MBT-Parenting Programme (LPP) is an evidence-based intervention, underpinned by research in the fields of attachment, child development, trauma and neuroscience and by core psychoanalytic concepts that offer insight into how our minds and relationships work.

The framework is developed for parents who struggle to know how to understand and respond to their children's emotional and behavioural difficulties. LPP interventions help parents to manage their own emotions, and to develop skills in noticing and thinking about their children's complex internal experiences.

The Lighthouse MBT-Parenting Programme (LPP) equips you with the skills and understanding necessary to foster healthier parent-child relationships. Participants in this five-day training course should be qualified health professionals who are familiar with basic MBT principles. This training is particularly valuable for clinicians interested in blending practical application with ongoing research.

Course Goals: Attendees will leave ready to implement the programme with supervision; understand both MBT generic and Lighthouse MBT-Parenting Programme-specific competencies; experience the parent's perspective in a group setting.

Accreditation: Attendees will be given a certificate of attendance certified by Solas Oxford, the sole licenced training institution for the Lighthouse MBT-Parenting Programme (LPP).
